FRIDAY MORNING, MARCH 30, 1860.

Our Railroads and Politics.

The following tribute by the North Carolina Standard to the energy and efficiency of the Presidents of our North Carolina Railroads is well des-rved While all have done well we know that Charles F. Fisher and John D. Whitford have sacrificed their individual interest, their health, comfort, and been subjected to long separations from their families in prosecuting the labors that devolve upon them as the heads of two of our great State works. And how have these labors been requited? Why by many only with abuse, slanderous charges and libellous insinuations. But the intelligence of the many will triumph over the vindictiveness of the few, and the triumphant manner in which charges were met and the enthusiastic re-election of these gentlemen last summer was not only a thorough vindication of their integrity, zeal and fitness for the places which they occupy but it was a demonstration by the public in their favor which should, and which did for a while, put to shame their puny revilers.

But we shall never have peace until Railroads and politics are separated. Mr. Fisher is abused because he is a democrat; Mr. Whitford has been persecuted and abused because he is not a democrat. We copy the following from the last Stan

that the N. C. Road is "rented out" to Mr. Fisher, freight, &c. Now, no one will believe this charge The Editor of the Patriot himself does not believe it It is but a continuation of the unjust warfare wag d on Mr. Fisher, simply be anse ne is a democ at, a because the Road prospers in his hands,

Mr. Fisher can well afford to disregard these a tacks. His labors, his anxieties, his sacrifices of time and health for the successor the Road speak for hin

The vipers are ghaving a file. We have paid some attention to the management of the Railroads in this State, and we can conscientionsly say that an effort would be made in vain to would perform their duties more junction-ly and satisfactorily than Messrs. Fisher, Pearson, A.he Wilder, and Whitford have performed theirs. No do as well as these gentlemen. We refer to the latter only because four of the Roads have been for some time in full operation, while the fitth (the Western Extension) is already in use for some fifty or sixty

Our Delegation.

Politicians North and South are not only very much prone to speculate on matters connect d with the next Presidency, but some of them are in the habit of stating, for facts, things which have no foundation whatever. A South Carolica paper we see gravely asserts that the North Carelina delegation are pledged to go for Gen. Joe Lane at Charleston, and some Northern paper has asserted that our delegation has decided to go for Hunter. Now both of these assertions are false Our delegation have not had time to think about who is to be the nominee yet; -- the great and most vital of all questions to them is, now, what is to be the price of board at Charleston? Can they get into a first class hotel at \$5 a day each they are to be served at Charleston) is settled then our delegation will be prepared to consider

that they will do what seemeth to them right and proper when the time comes to act.

AGRICULTURA ADDRESS .- We are indebted to the courtesy of the publisher, Mr. Yates, of the Charlotte Democrat, for a pamphlet copy of the Address of Hon. D. M. Our University.

It is not often, Mr. Editor, that I intrude my views or opinions upon any subject upon the public, but have under all circumstances felt a desire to see the golden maxim observed, "Let justice be done though the Heavens may fall." In the last number of the "Enquirer," of this place. I see an article headed "Murder in Chapel Hill." As to that portion of the article which refers exclusively to the homicide I have nothing to say, more than that from the particulars as given in the paper, I am at a loss to know by what process of reasoning, the editors come to the conclusion that it was murder.

As it has not as yet undergone a judicial investigation, they might at some future time be a party to a suit for libel. But what I wish to call to Chapel Hill, being in themselves devoid both of justice and patriotism, and so far as my knowledge extends, and I think I know something of the history of the University, they are not in accordance with the facts. In the first place he says, we are pained to learn that another murder has been committed in Chapel Hill, another outrageous deed added to the many." Now, Mr. Editor. the "Enquirer" has not shown in the first place, that the present homicide was a murder, and in the next place when was the first murder commitand it is more than probable if the Editors will reflect, and ask themselves when it was? they will be unable to answer the question. "Another outrageous deed has been added to the many." This, sir, is an aspersion upon the fair fame of the University, which she does not merit, and it is a matter of surprise that the intelligent Editors of the "Enquirer" should give vent to such uncharitable expressions.

The teeth are made in brass moulds, and this is quite a delicate process. The enamel is first put in place with a small steel spatula; the plantinum rivets, by which the teeth are fastened to the plate, are placed in the position, and then the body is pressed into the mould. They are then submitted to powerful pressure and dried. After being dried they are submitted to a process called biscuiting, in which state they can be cut like chalk. They are then sent to the trimmers, who scrape off all projections, and fill up all depressions which may have been left in that have not all run to seed like the poppy, and the operation of moulding, and then wash them that has really some of the old stamina left.
